CELLUGENA[®]

Neuronox[®]

Cellugena is renowned for its premium skin and hair innovative products for aesthetic professionals and consumers around the world.

Developed using the latest scientific research in stem cells, pharmaceutical active ingredients and exclusive patented Human Growth Factors, Cellugena products were developed in an FDA-registered manufacturing facility in USA under precise quality control to ensure safety and success.

The inventive active ingredients in our range of professional and consumer skin and hair care achieve profound results in areas such as aging, pigmentation and hair loss.

Active Facial Bio-Mask

HYACORP

HYAcorp is a range of dermal fillers made from crosslinked Hyaluronic acid for restoring the volume and contouring the face and body.

HYALURONIC ACID is a natural substance existing in human bodies which has been used in medicine for a long time and over many years has been proven to have an excellent safety profile

PBSERUM

Pbserum Cosmeceuticals

The pbserum cosmeceuticals range features the first recombinant enzymes of bacterial origin as active ingredients.

They have proven efficiency, ensuring fast-acting, visible and long-lasting results from the first application.

This innovative treatment is the result of many years' biotechnological research in the cosmetics and pharmaceutical industries, which has facilitated the development of biological active ingredients with a selective and specific action over various skin and subcutaneous tissue pathologies, representing a natural and safe alternative to classic chemical molecules.

- Biotechnological products of high purity and stability.
- Produced under the highest quality standards.
- Our products are not tested on animals.

RENU® is a Dermal Filler used for Facial Aesthetic enhancement and beautification. RENU®'s advanced CaHA based technology provides a longer lasting result.

RENU® does more than just fill facial wrinkles and folds such as nasolabial folds. Its advanced calcium based technology promotes the growth of a patient's own collagen to create fullness and a youthful appearance by restoring volumes that can last longer than other fillers.

Indications

- * Vocal Fold Medialization
- * Vocal Fold Insufficiency
- * Facial Wrinkles and Folds
- * Facial Fat Loss Correction
- * Facial Fat Loss Restoration
- * Facial Volume Restoration

Composition

Particles (~54%): CaHA Calcium Hydroxyapatite
(25 to 45µm in size) (w/w Nominal)

Gel (~46%): Sodium Carboxymethylcellulose--1.6%,
Glycerin- ~7%,
Phosphate buffer--37%, pH= 7.2

Storage Conditions: Room Temperature
Sterilization Method: Steam

RENU

Aqualift is approved by CE, TGA, GOST, IMVIMA, COFEPRIS.

Aqualift is widely used in over 55 countries around the world. The safety and effectiveness are officially authorized and registered from MOH (MINISTRY OF HEALTH) OF 23 COUNTRIES.

PDO- (Polydioxanone)

Polydioxanone improves fibroblast and include microcirculation. PDO suture is a biodegradable synthetic polymer, monofilament absorbable suture. It is hydrolyzed in the body and then naturally excreted by urine within 6 months. Thus, PDO suture is one of the safest materials that can be used in the body, and it offers far superior tensile strength. The absorption of polydioxanone suture is reliable and predictable. PDO threads are commonly used to lift, tighten and rejuvenate areas of sagging skin, and minimize fatty tissue.

PLLA - (Poly -L-Lactic Acid)

PLLA is biodegradable material with good bio-absorbability and bio compatibility extracted from plants, safety of PLLA approved by FDA, KFDA, completely decomposed into CO₂, H₂O and Glucose.

PLACL- Poly (L-Lactide -co-e-caprolactone)

Using best quality PLACL threads by one of the world's best thread companies, GUNZE. PLACL suture is state of art a new thread which complements all the disadvantage of PDO, PLLA, and PCL but also combines their advantage at the same time.

AQUALIFT

TSK aesthetic needles are specially designed for dermal filler and toxin injection. Cosmetic dermal filler products, such as hyaluronic acid, contain small particles and have high viscosity. Consequently making injection more difficult. For instance because conventional needles easily pop off from the syringe or become blocked. To overcome these problems TSK has developed special aesthetic needles with unique characteristics. Subsequently helping you enhance your cosmetic injection with improved accuracy, efficiency, and most importantly patient comfort.

TSK

Puregraft fat grafting is changing the way aesthetic and reconstructive medicine is practiced, matching procedure results to patient demand. We've spent over a decade perfecting our filtration technology to deliver the only fat grafting system clinically validated to improve long-term graft retention. Differentiate your practice with predictable outcomes using superior fat.

Engineered for Perfection

Puregraft's selective filtration technology gently dialyzes the harvested fat, removing only blood, oil, fluid, and fragmented cells within a closed system.

The result is a concentrated graft of healthy, viable fat cells.

Applications of Fat Transfer

Aesthetic

- * Natural Breast Augmentation
- * Natural Buttock Augmentation
- * Facial Rejuvenation
- * Hand Rejuvenation

Applications of Fat Transfer

Medical

- * Natural Breast Reconstruction
- * Scleroderma
- * Facial Disorders
- * Soft Tissue Trauma / Deficiency

PUREGRAFT

NEURAMIS

Neuramis is manufactured using a high-quality hyaluronic acid that is registered in the Drug Master Files (DMFs) and certified by the European Directorate for the Quality of Medicines (EDQM).

Neuramis raw materials comply with even higher standards than required by the European Pharmacopeia (Ph.Eur) to enhance safety.

NEURAMIS TREATING AREA

Zygomaticomalar region
Anteomedial cheek
Submalar region

NEURONOX

(Clostridium botulinum toxin type A)

Neuronox is a global product, registered in 35 countries with rapidly growing sales over the world.

Indications

- Neuronox is indicated for the treatment of benign essential blepharospasm in patients 18 years of age and older.
- Neuronox is indicated for the treatment of equinus foot deformity due to spasticity in pediatric cerebral palsy patients 2 years of age and older.
- Temporary improvement of serious labellar wrinkles ranging from moderate to severe associated with corrugator muscle and/or procerus muscle activities in adults over the age of 20 and below the age of 65.
- Muscles spasticity :Neuronox is indicated for the treatment of upper limb spasticity associated with stroke in patient 20 years of age and older.

Neuronox has proven to be safe and effective for **improving glabellar frown lines.**

MEDICAL AESTHETICS DEVICES

MIRApEel™
Micro-Infusion Rolling Abrasion

Intima RF®

With the touch of a button, select either the deep penetrating Erbium fiber laser (1550 nm) or the more superficial Thulium fiber laser (1927 nm). This is the first application of the Thulium wavelength in the aesthetic market and represents our commitment to developing innovative leading edge technology.

Indications

Skin Resurfacing, Fine lines and wrinkles, Acne scars
Surgical scars, Dyschromia, Cutaneous lesions - Age spots, sun spots, actinic keratosis & melisma

Benefits

- * Address both deep and superficial resurfacing
- * Thulium wavelength more effectively targets superficial skin layers
- * Superficial targeting of the Thulium wavelength and focal cooling improves patient comfort
- * Improved scanner design increases procedure speed by 25%
- * Patented continuous motion tracking system delivers safe uniform treatment with consistent results.

Specifications

- * Laser Type: Erbium (Er: fiber) Laser | Thulium (Tm: fiber) Laser
- * Wavelength: 1550 nm | 1927 nm
- * Pulse Energy: 4-70 mJ (per MTZ) 5-20 mJ (per MTZ)
- * Variable Optical SpotSize: Optimized for maximum depth of penetration
- * Pulse Repetition Rate: Up to 2,900 MTZs per second provided by ultra high-speed scanner delivery system

FRAX L

The Clear + Brilliant laser system is optimized to maximize patient comfort while still providing an effective and powerful fractional laser treatment. Clear + Brilliant treatments can help reveal smoother skin and even skin tone. Patients use words like “glowing” and “radiant” when they speak about the results they experience after Clear + Brilliant treatments. The positive feeling and renewed confidence patients get from Clear + Brilliant is remarkable.

Indications

Helps prevent the visible signs of aging and address the overall effects time and the environment can have on your skin, Makes skin look younger and radiant glow after treatment, Enhance skin permeability, Prevent early signs of aging and Improve overall skin texture, Minimize appearance of pore size and Enhance firmness and elasticity.

Benefits

Minimal training needed, quick and easy operation
Continuous patented delivery method
Uniform distribution regardless of operator speed
Easily transported between treatment rooms and/or office locations

Specifications

- * Laser: Diode
- * Type: Fractional
- * Wavelength: 1440 ± 20 nm; min:1420 max:1460
- * Maximum Power (average): 2.5 W
- * Maximum Pulse Energy: 9 mJ
- * Maximum Pulse width: < 5 ms
- * Pulse Repetition Rate: < 400 Hz

CLEAR & BRILLIANT

Thermage CPT – the latest in skin tightening technology, from the pioneers of the science. It's a simple fact – all technology evolves. Making a patient comfortable is the first step in delivering the best results. With CPT, delivering the dramatic and consistent results you and your patients really want is simpler than ever.

Indications

The Eyes - (fine lines, the upper and lower eyelids)

The Face - (loose jaws, sagging skin and wrinkles)

The Body - (sagging skin and unwanted bulges and dimples)

Benefits

Sleeker, streamlined unit, Simple, user-friendly interface
Ergonomic handpiece, Integrated comfort cooling and
Multiple treatment tips.

Specifications

- * AC Input Rating: 100-240V, 50/60Hz, 10A
- * RF Output: RF energy: 6.78 MHz \pm 0.1%.
- * Maximum Average Power: 400 W.
- * Maximum current: 2.0 ARMS + 10%.
- * Duty Cycle: 50%, intermittent use

THERMAGE

The VASERlipo System is a minimally invasive ultrasonic body contouring device that's creating a revolution in aesthetic surgery. With this new level of versatility, you can perform a wide range of contouring applications – from significant fat reduction to precise sculpting on all areas of the body.

Indications

Body Sculpting, Liposculpting, Lipolysis, Fat Transfer and 4D High Definition Body Sculpting

Benefits

- * Minimally invasive with fast patient recovery
- * Ultrasound energy specifically tuned to preserve connective tissue and maintain fat cell viability
- * Clinically proven to enhance skin retraction and reduce blood loss
- * Wide array of probe and cannula options to treat all areas of the body
- * Can be conveniently performed right in your own office surgery suite or as an out-patient procedure at a surgery center or hospital.

Components

Precision Fluid Management System™, VentX Aspiration, VASER® Amplifier, Reversible Peristaltic Pump, Wireless Footswitch System, VentX® Precision Vented Cannulas, VASER Grooved Probes and Handpieces

VASERLIPO

Mirapeel- New, comprehensive Cosmetic System with unique accessories designed to achieve novel 3D Skin Desquamation and Fractional Transbrasion. MIRApeel is currently distributed by Vitateck across the entire Middle-East.

The MIRApeel™ System comes with a full range of unique scientifically-designed and engineered accessories and has available proprietary cosmetic serums, lotions. The MIRApeel™, MIRA accessories and MIRAjolie™ Serums introduce a cutting edge technology using a 3D cellular desquamation technique completed by a wet microneedling technology called Fractional Transbrasion™.

Indications

For Face, neck and décolleté MIRApeel is the most effective, most comprehensive skin therapy modality. MIRApeel offers a full range of accessories, serums and cream for full body treatments.

Most common skin conditions: Rejuvenation, Wrinkling, Dry skin, hyperpigmentation treatments (with a boost of Vitamin C and the Roversome complex ACE)

Accessories

MIRApeel™

Utilizes the MIRAjolie™ serums to flow within its unique, non-invasive, single-use attachments (Face or Body) onto the skin.

MIRArollers™

Skin Microneedling micro-protrusions attachments providing a pleasant, wet cooling sensation, gliding onto the skin smoothly and painlessly.

MIRAbrasor™

3D Cellular Desquamation; safe, unique gentle skin abrasive apparatus.

MIRAPEEL

The RF devices that emit focused monopolar radio frequency waves generating heat upon meeting tissue impedance have been widely applied for an array of aesthetic indications in facial and off-face sites, in addition to the vaginal tightening indications.

How it Works!

Vaginal mucosa and skin differ significantly in epithelium structure. The outer skin layer has plenty of keratin and little water, while mucosal epithelium is nonkeratinized, containing water and glycogen. Due to their different levels of hydration, the Co2 laser (highly absorbed by water) has different effects on skin and on mucosa.

By harnessing RF waves to heat the connective tissue of the Vaginal wall to 42 °C to 45 °C, these energy-based devices aim to induce collagen contraction, neocollagenesis, vascularization, and growth factor infiltration that ultimately revitalize and restore the elasticity and moisture of the vaginal mucosa.
